**AS PIONEERING ADVOCATES  
OF FUNCTIONAL MEDICINE,**

we use state-of-the-art diagnostic tools, bio-identical to nature proprietary IV infusions and supplements, and non-invasive physical therapies to maximize the inherent efficiency of your immune system so that you cultivate the natural inner strength to recover from illness and injury quickly and become less susceptible to health issues in the future.

# YOUR BODY IS YOUR BEST DOCTOR

Miskawaan Health Group's experienced physicians provide visionary healthcare by combining Functional Medicine concepts with cutting-edge diagnostics and analysis. This approach is holistic and considers the whole individual – lifestyle habits, family medical history, health circumstances and treatment expectations included. Eschewing modern medicine's enthusiasm for prescribing pills for all ills – mass-produced pharmaceuticals that only treat symptoms and weaken the immune system in the long term – we listen to you and your body to get to the root cause of your illness and we tailor a bio-identical recovery plan that works from within to return you to optimal health.

# MISKAWAAN KEY DIAGNOSTICS

Miskawaan's doctors create customized medical plans to meet your precise health goals, including personalized pharmacy and integrative therapies to treat chronic illnesses such as heart disease, autoimmune disorders, and cancer. For early cancer screening, we use **Epitope Detection in Macrophages Technology (EDIM), coupled with Metavectum Tumor-Therapy Testing** to assist physicians both in their diagnosis and choice of individualized therapies to match the client's health profile.

Our health check-ups and treatment programs focus on biochemical individuality, metabolic balance, ecological context, genetic predisposition, lifestyle patterns and other factors that have the potential to influence human physiology and the push-pull dynamics of health and disease.

“MISKAWAAN BELIEVES THAT A DEFENSIVE HEALTH STRATEGY IS CRITICAL TO OPTIMAL HEALTH.”
